21. (New) The apparatus according to claim 15 wherein the injecting means comprises a helical channel for directing the compressed gas about the body.
4. U.S.C. 112, sixth paragraph and is understood to effectively incorporate the structure of an orifice on an inner surface of the body (as claimed in claim 2), a helical channel (as claimed in claims 20 and 21) that is located about the internal bore of a fitting on the body (as clarified by the applicant's Remarks submitted on 7/7/2009) and a nozzle (also clarified by the applicant's Remarks submitted on 7/7/2009) in combination with the rest of the limitations set forth in the independent claims.
